There are risks associated with an investment in any structured product. Structured products are not suitable for everyone. In addition to understanding the USPs of structured products, professional advisers also need to understand their risks and limitations: structured products present counterparty risk - the potential returns of a structured product and the repayment of money invested in a structured product usually depend on the financial stability of the issuer and counterparty; the level of return a structured product generates may be capped and / or less than the level of return generated by direct investment in the stock market or via active or passive funds; the terms of structured products can predefine what can be expected at maturity and at certain other dates, such as potential 'kick-out' and early maturity dates - but these terms do not apply during the investment term; the value of structured products during the investment term may be affected by various factors - while accessing an investment is usually possible, during normal market conditions, this is not guaranteed; past performance is not a reliable indicator of or guide to future performance and should not be relied upon, particularly in isolation; the value of investments and the income from them can go down as well as up; capital is at risk and investors could lose some or all of their capital. The 'important risks' section of our website highlights the key and other risks of structured products: www.tempo-sp.com/home/important-risks. Professional Advisers should access and read the relevant plan documents relating to any structured product plan of interest, in particular: the plan brochure; 'if / then summary ...'; plan application pack, including, the terms and conditions of the plan; and the issuer's key information document (KID), securities prospectus and final terms sheet, before making a recommendation to their clients. Professional Advisers should not invest in, or advise their clients to invest in, any investment product unless they and their clients understand them, in particular the relevant risks.

There are risks associated with an investment in any structured product. Structured products are not suitable for everyone. In addition to understanding the USPs of structured products, professional advisers also need to understand their risks and limitations: structured products present counterparty risk - the potential returns of a structured product and the repayment of money invested in a structured product usually depend on the financial stability of the issuer and counterparty; the level of return a structured product generates may be capped and / or less than the level of return generated by direct investment in the stock market or via active or passive funds; the terms of structured products can predefine what can be expected at maturity and at certain other dates, such as potential 'kick-out' and early maturity dates - but these terms do not apply during the investment term; the value of structured products during the investment term may be affected by various factors - while accessing an investment is usually possible, during normal market conditions, this is not guaranteed; past performance is not a reliable indicator of or guide to future performance and should not be relied upon, particularly in isolation; the value of investments and the income from them can go down as well as up; capital is at risk and investors could lose some or all of their capital. The 'important risks' section of our website highlights the key and other risks of structured products: www.tempopsp.com/home/important-risks. Professional Advisers should access and read the relevant plan documents relating to any structured product plan of interest, in particular: the plan brochure; 'if / then summary ...'; plan application pack, including the terms and conditions of the plan; and the issuer's key information document ('KID'), securities prospectus and final terms sheet, before making a recommendation to their clients. Professional Advisers should not invest in, or advise their clients to invest in, any investment product unless they and their clients understand them, in particular the relevant risks.
