Underlying

Reference Rate	Relevant Screen Page	Fixing Time	Website
CMS.SOF.USD.10Y	Bloomberg Page "USIS10 Index"	11:00 am New York time	https://sgi.sgmarkets.com/en/index

The CMS (Constant Maturity Swap) rate is a financial market reference rate used for fixed-to-floating rate swaps (so-called interest rate swaps) for a specified term. Therefore, the CMS.SOF.USD.10Y is the reference rate for fixed-to-floating interest rate swaps in USD with maturities of 10 years.

Type

This product is a structured deposit governed by English law.

Objectives

This product is designed to provide a fixed coupon or a conditional coupon on a periodic basis. It is possible for the product to be automatically redeemed early based on pre-defined conditions. If the product is not redeemed early, the coupon will be linked to the performance of the Reference Rate. The product provides full capital protection at maturity only.

Fixed Coupon

On the Fixed Coupon Payment Date, you will receive the Fixed Coupon

Coupon

Provided that the product has not been previously redeemed early: On each Coupon Observation Date, if the level of the Reference Rate is at or below the Coupon Barrier, you will receive the Coupon on the corresponding Coupon Payment date. Otherwise, you will not receive the Coupon.

Automatic Early Redemption

On any Early Redemption Observation Date, if the level of the Reference Rate is at or below the Early Redemption Barrier, the product will be redeemed early and you will receive 100% of the Nominal Value, on the Early Redemption Payment Date.

Final Redemption

On the Maturity Date, provided that the product has not been redeemed early, you will receive a final redemption amount. At maturity, you will receive 100% of the Nominal Value.

Additional Information

- The level of the Reference Rate corresponds to its value, published on the Relevant Screen Page at the Fixing Time.
- Coupons are expressed as a percentage of the Nominal Value.
- Extraordinary events may lead to changes to the product's terms or the early termination of the product and could result in losses on your investment.
- The product is available through a public offering during the applicable offering period in the following jurisdiction(s): United Kingdom

Intended Retail Investor

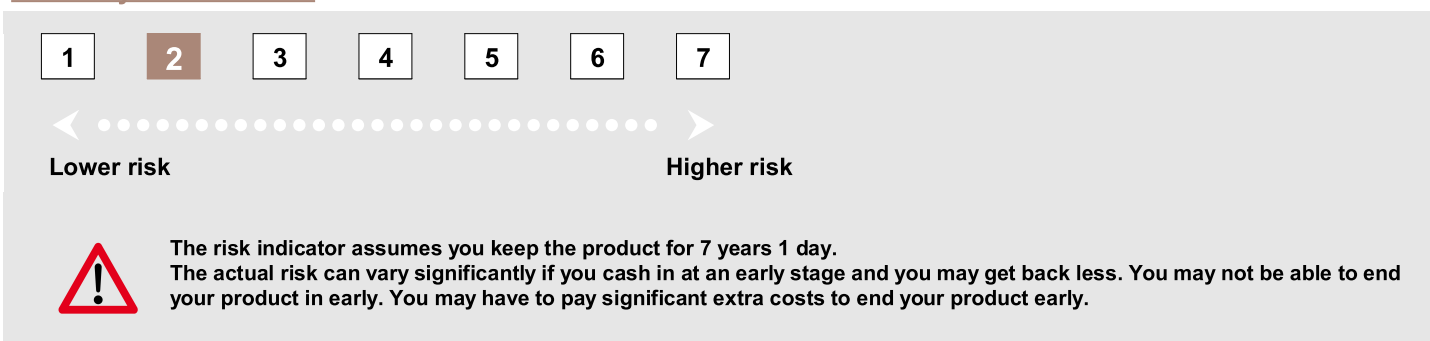

The product is aimed at investors who:

- Have specific knowledge or experience of investing in similar products and in financial markets, and have the ability to understand the product and its risks and rewards.
- Seek a product offering income with full capital protection and have an investment horizon in line with to the recommended holding period stated below.
- Are able to bear a total loss of their investment and any potential return in case of default of the Issuer and / or Guarantor.
- Understand that the minimum reimbursement only applies at maturity and they could receive less than this amount if the product is sold beforehand.
- Are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below
- Are willing to take a certain level of risk in order to obtain a potential return corresponding to the total risk indicator indicated below.

(*) "capital" here means the nominal value of the deposit, not the amount invested.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Summary Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

You are entitled to receive back at least 100% of your capital (where "capital" means Nominal Value and not invested amount). Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash in before the Maturity Date.

If we are not able to pay you what is owed, you could lose your entire investment.

Investment Performance Information

Factors affecting the product performance

The main factors that could affect the performance of the product is the performance of the underlying instrument(s) along with Societe Generale London Branch (SGLB) creditworthiness, which could have a material impact on the return, for instance if Societe Generale London Branch (SGLB) is unable to pay out the redemption amount.

Some other factors (such as the remaining time to the redemption date, interest rates, exchange rates, credit spreads, the dividend yield of the underlying where applicable, and in the case of multiple underlyings, the correlation between the various underlyings) could also affect the overall performance of the product on the secondary market.

There is no relevant index, benchmark or proxy which historical performance can be compared to the potential future performance of this structured product.

What could affect my returns?

The potential yield of the product at maturity will depend, in particular, on the scenario of evolution, until maturity of the product, of the factors that may affect its performance, mentioned above.

In a favorable scenario, if you hold the product to maturity or, (where applicable) until it early redeems, you might expect a return of 6.29% per annum.

In a moderate scenario, you might expect a return of 5.94% per annum.

In an unfavorable scenario, you might expect a return of 0.90% per annum based on an estimate of future performance. This case occurs when the underlying performs negatively, i.e. falls compared to its reference level in the product.

For the three scenarios above, if Societe Generale London Branch (SGLB) is not able to meet its obligation, you will have a negative return and could lose the entire initial amount.

Outcomes in severely adverse market conditions

In severely adverse market conditions, its expected return would be 0.0%. Furthermore, the product may undergo major price movements during the life of the product. The expected return can only be achieved if you don't exit before the maturity date of the product. This does not take into account the situation where Societe Generale London Branch (SGLB) is not able to meet its obligation.

All expected return figures presented in this section result from statistical calculations in accordance with the methodology prescribed under the PRIIP Regulation. They do not represent the return you will receive in each scenario but only a probability of return.

WHAT HAPPENS IF SOCIETE GENERALE LONDON BRANCH (SGLB) IS UNABLE TO PAY OUT?

If SGLB defaults or is unable to meet its financial obligations, you may suffer a partial or total loss of the invested amount. Please be aware that SGLB is covered by the UK Financial Services Compensation Scheme (FSCS) and if we are not able to pay you in relation to the deposit, you may be entitled to compensation under certain conditions and subject to certain limits.

The compensation limit applies to the aggregated amount of all of your deposits with SGLB and not to this deposit only. Any amount exceeding the

compensation limit will not be covered by the protection of the FSCS. For more information, please visit the FSCS website www.fscs.org.uk.

WHAT ARE THE COSTS?

Costs over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment GBP 10,000.00

Scenarios	If you cash in after 1 year	If you cash in after 4 years	If you cash in at the end of the Recommended Holding Period
Total costs	GBP 783.25	GBP 937.04	GBP 894.55
Impact on return (RIY) per year	7.79%	1.93%	1.02%

Composition of Costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	1.02%	The impact of the costs you pay when entering your investment. The impact of the costs already included in the price.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs taken each year	Portfolio transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.00%	The impact of the costs that we take each year for managing your investments and the costs presented in Section II.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended Holding Period: 7 years 1 day, which corresponds to the product maturity.

Under normal market conditions, Société Générale or an entity of its group ensures a daily secondary market during the life of the product by providing bid and offer prices expressed as percentages of the Nominal Value and the difference between the bid and offer prices (the spread) will not be more than 1% of such Nominal Value. If you want to sell the product before the Maturity Date, the price of the product will depend on market parameters at the time you wish to sell and you may sustain a partial or total capital loss. In unusual market condition, the resale of the product may be temporarily or permanently suspended.

HOW CAN I COMPLAIN?

Any complaint regarding the person advising on, or selling, the product can be submitted directly to that person. Any complaint regarding the product or the conduct of the product manufacturer can be submitted to Société Générale at the following address: SOCIETE GENERALE, Regulatory Information Department, 17 cours Valmy, 92987 PARIS LA DEFENSE CEDEX, FRANCE - SG-complaints-kid@sgcib.com (<http://kid.sgmarkets.com>).
