Early redemption and adjustments

The terms of the product provide that if certain defined events, in addition to those described above, occur (principally but not exclusively in relation to any Underlying, or the Manufacturer of the product (which may include the discontinuation of the Manufacturer's ability to carry out the necessary hedging transactions)), adjustments may be made to the terms of the product to account for the relevant event or the product may be early redeemed. The amount paid on any early redemption may be less than the amount originally invested.

Intended retail investor

This product is intended for clients who:

- have significant knowledge and experience in products such as the one described in this document
- are willing and able to bear a potentially total loss
- have a risk tolerance consistent with the summary risk indicator in this document
- are expressing a view on the underlying consistent with the conditions for a positive outcome (as stated in the product description)
- have a horizon consistent with the term of this product

as determined independently or on the basis of professional advice.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Summary Risk Indicator

The risk indicator assumes you keep the product until 9 April 2029. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because Crédit Agricole CIB Financial Solutions is not able to pay you. We have classified this product as 5 out of 7, which is a medium-high risk class. This classification takes into consideration two elements: 1) the market risk - that rates the potential losses from future performance at a medium-high level; and 2) the credit risk which estimates that poor market conditions are very unlikely to impact the capacity of Crédit Agricole CIB Financial Solutions and the guarantor to pay you. **If a PRIIP is denominated in a currency other than the official currency of the Member State where the PRIIP is being marketed, the return, when expressed in the official currency of the Member State where the PRIIP is being marketed, may change depending on currency fluctuations.** A risk that is materially relevant to the product but not included in the summary risk indicator is the risk that in the event the product redeems early due to an autocall, you may be unable to reinvest your money at an attractive rate. The summary risk indicator, which has been determined in accordance with Regulation (EU) No 1286/2014, being derived from the historical performance of the Underlying(s), may understate the risk of losses you may experience in connection with this product. This product does not include any protection from future market performance so you could lose some or all of your investment. If Crédit Agricole CIB Financial Solutions and the Guarantor are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

Investment GBP 10,000				
Scenarios		1 year	4 years	8 years (Recommended holding period)
Stress scenario	What you might get back after costs	GBP 44	GBP 3,759	GBP 2,888
	Average return each year	-99.56%	-21.70%	-14.38%
Unfavourable scenario	What you might get back after costs	GBP 6,865	GBP 7,878	GBP 10,700 (Ω)
	Average return each year	-31.35%	-5.79%	0.85% (Ω)
Moderate scenario	What you might get back after costs	GBP 8,909	GBP 10,700 (Ω)	GBP 10,875
	Average return each year	-10.91%	1.71% (Ω)	1.05%
Favourable scenario	What you might get back after costs	GBP 10,700 (Ω)	GBP 11,400 (Ω)	GBP 12,100 (Ω)
	Average return each year	7.00% (Ω)	3.33% (Ω)	2.41% (Ω)

(Ω) Product matured early, prior to specified term.

This table shows the money you could get back over the next 8 year(s), under different scenarios, assuming that you invest GBP 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot

be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before maturity. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

WHAT HAPPENS IF CRÉDIT AGRICOLE CIB FINANCIAL SOLUTIONS AND THE GUARANTOR ARE UNABLE TO PAY OUT?

This product is not protected by any investor compensation or guarantee scheme. If Crédit Agricole CIB Financial Solutions and the Guarantor are unable to make a payment and/or are in default, you may lose some or all of your invested amount and any payment may be delayed.

WHAT ARE THE COSTS?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for 3 different holding periods. They include potential early exit penalties. The figures assume you invest GBP 10,000. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

INVESTMENT GBP 10,000			
SCENARIOS	IF YOU CASH IN AFTER 1 YEAR	IF YOU CASH IN AFTER 4 YEARS	IF YOU CASH IN AT THE END OF THE RECOMMENDED HOLDING PERIOD
Total costs	GBP 387.50	GBP 337.50	GBP 337.50
Impact on return (RIY) per year	3.63%	0.88%	0.43%

Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- The meaning of the different cost categories.

This table shows the impact on return per year			
ONE-OFF COSTS	Entry costs	0.43%	The impact of the costs you pay when entering your investment. The impact of the costs already included in the price.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
ONGOING COSTS	Portfolio transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.00%	The impact of the costs that we take each year for managing your investments.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

Recommended holding period: 8 year(s), or until an autocall event occurs.

The product is designed to be held until the end of the recommended holding period.

The recommended holding period is selected to correspond with the maturity date of the product. Please note that you may not be able to sell the product prior to the maturity date. If you are able to sell the investment at an earlier date, you may incur costs and may lose part or all of your investment.
